

LAKE FOREST

Forest Park Beach Parking & Capacity 2020

Parking

Lower North Lot

- A 2020 City of Lake Forest vehicle sticker must be secured to your vehicle's front windshield.
- When the lower north parking lot is full it is closed until parking spaces re-open.
 - Once parking spaces become available, vehicles will be allowed to access the lower lot based on the number of spaces open.
 - At the top, you may be asked to either wait in your car, or circle around depending on the amount of cars waiting. We cannot have cars blocking traffic on Lake Road.
- You may be directed to park in overflow parking on the ring road.
- There is no street parking.

Overflow Parking:

- A small number of cars will be allowed to park in the grass on the ring road.
- These spaces will be directed by staff and when full, parking will no longer be allowed until spaces open up.
- Parking in this area is for overflow purposes only and will not be filled first.

Note: due to the timing of your arrival at the facility, you may be directed to overflow parking and parking in the lower north lot may open up after you have begun your descent of the stairs.

Upper South Lot:

- The upper south parking lot will remain open to patrons displaying the 2020 City of Lake Forest or Beach Parking sticker.

Lower South Lot:

- The lower south parking lot is for 2020 boat launch, boat storage, and south beach access permits only. Residents may purchase a lower south lot parking permit for \$126.00, Resident seniors: \$99.00.

Capacity

- For the safety of the public and to insure social distancing, if the beach reaches capacity the City will close the beach to additional walk-ins and parking (both at the north and south parking lots) until capacity decreases.
- This decision will be made at the discretion of city staff.
